

## Creating and Editing Data with ArcGIS Pro

Duration: 2 Days (16 Hours)

Maintain the accuracy of your authoritative GIS data.

This course teaches best practices to create accurate geographic data and maintain it over time. You will get ample hands-on practice with a variety of ArcGIS Pro tools that streamline the editing process and decrease the potential for errors when updating your GIS database

### Goals

**Apply** a standard editing workflow to manage updates to geographic data.

**Configure** ArcGIS Pro application and project settings to support efficient editing

**Create**, modify, and delete 2D and 3D features and attributes.

**Solve** common data alignment issues and maintain spatial relationships among features when editing

### Who should attend?

**GIS Professionals**

#### Suggestion

Completion of **ArcGIS Pro: Essential Workflows** or equivalent knowledge..

#### Software

Esri will provide the following software to use during class:

- **ArcGIS Pro 2.0 (Standard or Advanced)**
