

Topic Specific

Migrating from ArcMap to ArcGIS Pro

Duration: 2 Days (16 Hours)

Meet the ArcGIS Desktop app that makes GIS work more fun.

With faster tools and integrated 2D and 3D capabilities, ArcGIS Pro will streamline your GIS projects. This course prepares experienced ArcMap users to be productive right away. Learn essential ArcGIS Pro terminology and concepts and how to efficiently complete a variety of tasks related to mapping, editing, analysing, and sharing geospatial data and resources.

Goals

Create an ArcGIS Pro project and import map documents and 3D scenes.

Create and modify map symbology and layouts.

Import a geoprocessing model and identify potential migration issues.

Share geospatial resources to an ArcGIS Online organizational site or on-premises ArcGIS portal.

Who should attend?

GIS analysts

GIS Specialists

GIS data managers

Database administrators

Suggestion

This course assumes significant ArcMap experience. If you are brand-new to ArcGIS Desktop, take **ArcGIS Pro: Essential Workflows** instead of this course.

Software

Esri will provide the following software to use during class:

- **ArcGIS Pro 2.1 (Advanced)**
