

## Sharing GIS Content Using ArcGIS

Duration: 2 Days (16 Hours)

**Enable location-based insights and data-driven decisions across your organization**

Learn how to efficiently share a variety of geospatial resources to an ArcGIS Online organizational site or ArcGIS Enterprise portal website. This course teaches how to publish high-performing services that extend ArcGIS mapping and analytics capabilities across your organization.

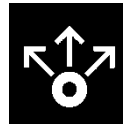

### Goals

**Share** content between ArcGIS portals.

**Devise** a sharing strategy that supports your organization's workflows and business goals

**Share** map layers, web maps, data, imagery, custom analysis tools, and ArcGIS Pro project packages.

**Create** map and vector tile caches to enable fast display performance.

### Who should attend?

**GIS Professionals**

#### Suggestion

Completion of **ArcGIS Pro: Essential Workflows** or **Migrating from ArcMap to ArcGIS Pro** or equivalent knowledge.

#### Software

Esri will provide the following software to use during class:

- **ArcGIS Enterprise 10.6 (Standard or Advanced)**
- **ArcGIS Pro 2.1 (Advanced)**
- **Web AppBuilder for ArcGIS**
